

STAT  
3 April

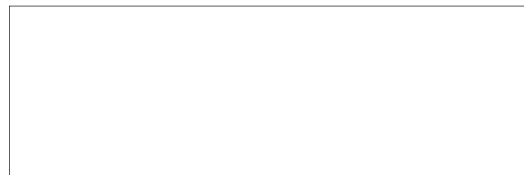

April 2, 1964.

*Control*

Installation requirements for laser enlarger, other than space and floor strength previously indicated:

1. Electrical: 30 amps at 115 volts nominal, 60 cycles A.C. As far as is now known, fluctuations of line voltage will not cause any difficulties.
2. Venting: A 4" diameter duct vented to the atmosphere will be required. Blowers are included with the unit.

In addition to the above, it should be noted that the unit will include an air compressor with sufficient hose and cable to permit location in an adjacent room.
